Subject: Ridley's Eagle Mountain Early Morning Concrete Pours

TO WHOM IT MAY CONCERN,

We are requesting permission to start concrete slab pours at 4:00AM for the Ridley's Market construction in Eagle Mountain, Utah. We ask for a certain time frame to give us an efficient window for the 4 pour we will be doing, for we do not know specific dates at this time as there are many variable regarding the schedule. Please be aware we are not asking for any weekends, the window we are requesting starts Friday September 13th, again no weekend and starting up again for September 16, 17, 18, 19, 20 and the following week as well, September 23, 24, 25, 26, 27. The following are some of the benefits in doing this:

- 1) We will be able to avoid majority of concrete mixer trucks through school zones on Pony Express Parkway.
- 2) The temperature for placement and finishing of concrete is more desirable during this time of year with an early morning start.
- 3) Due to long duration of placing, finishing and saw-cutting- the 4:00 AM start time allows us to complete saw cutting process without violating the noise ordinance at night.
- 4) The proximity of this project to residential housing allows enough distance to minimize impact to surrounding neighbors.
- 5) The loudest noise will be from backing-up alarms on cement mixer trucks and will be kept to a minimum by our staff.

Please consider these reasons as you review our request.

The Ridley's owner will obtain a better finished floor under these circumstances.

Respectfully,

Henry Barlow; Pres.
Rocky Mountain Concrete, Inc.
